Education

Yeshwantrao Chauhan College of Engineering, Nagpur, Maharashtra, India **2023 - 2027**
- **Major:**Artificial Intelligence & Data Science || **Minors:**Cloud Computing ||Avg CGPA: 8.97(till 5th sem) (expected)

Vidharbha Buniyadi College,Nagpur, Maharashtra, India **2023- 2022**
- *Class XII, Aggregate: 80%*

Amit English High Nagpur, Maharashtra, India **2019 - 2020**
- *Class X, Aggregate:95%*

Skills

Python | Machine Learning -NLP &CV | Deep Learning and Neural Networks | Big Data | Blockchain | Git&Github | Java-Data Structures and Algorithms | OOPS | DBMS-SQL | SpringBoot | JDBC | Cloud Computing | Cloud Web Services | Prompt Engineering | LLM Orchestration

Projects

Amazon ML Challenge 2025 – Multimodal Product Price Prediction **Oct-2025**
• Built a multimodal deep learning model combining DistilBERT and EfficientNet-B0 for e-commerce price prediction.
• Optimized large-scale model training using PyTorch Distributed Data Parallel (DDP) on NVIDIA A100 GPUs, significantly reducing training time.
• Developed a custom SMAPE-based loss function for improved regression performance aligned with competition metrics.
Tech Stack: Python, PyTorch, Hugging Face, Torchvision, Scikit-learn, Pandas
Concepts: Multimodal Learning, NLP, Computer Vision, Deep Learning, Distributed Training, Regression Analysis

Research Queen — Multi-Agent Research System **March-2026**
• Built a Multi-Agent AI system using LangChain and LangGraph for automated web search, content extraction, report generation, and research evaluation.
• Integrated Groq LLMs, Tavily Search API, and BeautifulSoup-based web scraping for real-time AI-powered research automation.
• Developed an interactive Streamlit application with modular agent workflows and LLM orchestration.
Tech Stack: Python, LangChain, LangGraph, Streamlit, Groq API, Tavily API
Concepts: Multi-Agent Systems, Generative AI, Prompt Engineering, LLM Orchestration, Web Scraping

UPI Offline Mesh — Secure Payment Backend **May-2026**
• Developed a Spring Boot backend for offline UPI-style payment processing with secure mesh-based transaction routing.
• Implemented REST APIs, transactional settlement logic, duplicate request handling, and concurrent payment processing using Spring Data JPA and Hibernate.
• Built secure payment transmission using RSA + AES encryption, SHA-256 hashing, and replay protection mechanisms.
Tech Stack: Java, Spring Boot, REST APIs, Spring Data JPA, Hibernate, Maven, H2 Database, Multithreading

Academic and Extracurricular Achievements

Competitive Ranking: Secured **2nd Rank** in the **ML Classification Challenge** (Image Net|YCCE) **Aug,2025**
Leetcode: Solved 450+questions. Regularly solving questions which enhances my logical thinking and problem solving skills.
Codeware Club YCCE-Semi-core
Eagles Club YCCE-Part of Elite Students Group
Class Representative | AI & DS: Served as a bridge between students and faculty, enhancing leadership, communication, and problem-solving skills.
